

BHV BROADCAST

Phantom power over video cable

Video Ghost transmitter, power input to system

Video Ghost receiver, power output from system

Award winning Video Ghost gives you the capacity to run DC power in the same cable as your SD or HD SDI video signal. The system is bi-directional, so can be used to power either cameras or monitors

- 12 or 5 volt switchable
- 40W (12V) or 20W (5V)
- Cable length in excess of 100m (SDI) or 50m (HD)
- Overload and short circuit protected
- Safety interlock protects connected equipment
- Compact and robust
